

# FLARE's LivWell Tool

LivWell is a low-cost, convenient tool to monitor and track the well-being of households, and to help estimate the livelihoods and well-being impacts of projects, policies, and other forest interventions.

Livelihoods and Well-being

# LivWell

Monitoring and Impact  
Estimation Tool

# LivWell 2017

## About:

The FLARE LivWell tool focuses on natural resource-related interventions and phenomena that affect economic and ecosystem well-being. LivWell generates data that compliments, extends, and can be compared with existing surveys and datasets.

## What can LivWell do?

- Assess community well-being
- Estimate intervention impacts on community livelihood and well-being
- Compare livelihood and well-being data across geographic locations
- Estimate changes in community livelihoods and well-being over time

## Why use LivWell?

- Free, streamlined
- Includes user manual for organizations and enumerators
- Easy to follow questions
- Data can be stored in a public centralized database
- Automatic capture of geographic information
- Based on national household surveys
- Offers data visualization and analyses
- Possible wider applications in assessing impacts of other forms of interventions in other ecosystems

## Target Users:

Practitioners, project personnel, researchers of all levels, and donors/foundations interested in estimating impacts of external interventions on household livelihoods and well-being.

# How to use this tool?

1

**Register your project at [www.forestlivelihoods.org](http://www.forestlivelihoods.org) (select "LivWell" under "Resources" tab).**

2

**Download the user manual and wait for a confirmation email with an assigned Project ID.**

3

**Start collecting your data offline, and send responses to cloud server online.**

4

**Download your data following the user manual, and visit the LivWell visualization and analytics site.**
